

FEATURE SITEMAP · AUGUST 2026

Every surface, from every seat.

[Download the PDF ↓](#)

VYB is one product with eight seats. Each seat gets the same shell, its own surface, its own agent, and a capability scope that is narrow by default. This page lists all of it – what every persona can open, and what they can do there.

01

The shell every seat gets

Home

The seat's day: decisions waiting on you, tonight, the seat's own cards, shortcuts.

Cal

The calendar – the tour for the crew, the room's dates for an operator.

Talk · VYB Voice

The orb. Talk to VYB; the brief comes back in the seat's own terms.

Inbox

Waiting on you · auto-applied · threads. Badge = what actually needs your tap.

Me

Your seat: your agent, your surface, tasks assigned to you, every surface you may open, audit & reports, demo controls.

Concierge · iMessage

@vyb in a thread → a proposal card → tap-confirm → every screen updates. Money never executes from a message.

Your vyb

Every seat gets its own vyb – it texts you at hours it has learned, with provenance, and asks – never acts.

Between teams

Your agent talking to another team's agent. Agents negotiate; humans confirm; every shared fact carries the permission it crossed under.

Audit trail & reports

Everything consequential, scoped to what the seat may read. Exports are audited.

Artist

Sasha R. · indie / r&b

Tonight's show, offers waiting on you, your split · a seat that says yes or no and never has to open a spreadsheet.

Surface · The act's own seat

Your vyb

HOME

Tonight · Knockdown Center – doors, soundcheck, set

Decisions waiting on you – offers, routing, press

Incoming proposals – dates an agent put in front of you – you confirm

Tour merch – your split · sell-through · view only

Drops – next drop · what's on you

Your vyb – the few things only you can answer

Tour map – the run on Apple Maps

SURFACES

Bidding queue – offers from rooms; your manager locks them

Show detail – settlement sheet · crew

Listen – versions, time-coded notes, listen/edit grants

Camera Roll – upvote the team's frames

Drops – release + merch: sign off the master, artwork, mockups

Rollout – the campaign around the drop: your vyb as social index + creative czar – bring an idea, however abstract, or ask it for concepts; the treatment lands when both seats sign

DSP integration – your distributor (Stem / DistroKid / TuneCore) delivers to Spotify, Apple Music, YouTube Music, Amazon Music, Tidal – per-store delivery state, pre-saves before the date, streams after

Spotify for Artists · Apple Music – connected accounts – streaming reads back into your seat

Advance – capital against confirmed dates – your call

VYB Card – your Apple Pay access · view

Between teams – read what your desk negotiates in your name

Venue · Score – trust the room before you play it

DJ

house / breaks

Residencies and one-offs, the fee a promoter actually paid last time, USB and rider state.

Surface · Sets, fees, riders

Your vyb

HOME

Tonight · Resident Sundays – set window, BPM ramp, USB ready

Decisions – confirm the B2B, the door rotation

Your vyb – the promoter's record against their terms

Drops – release + merch

SURFACES

Sets · fees · riders – the seat's own surface

Listen – version control for the edits

Drops – sign off releases and runs

DSP integration – per-store delivery, pre-saves and streams for every release

Advance – against confirmed sets

Between teams – observer

Venue · Score – read

Tour Photographer

stills

Shoot rolls the team upvotes, selects due to press, deliveries recorded as grants.

Surface · The delivery desk

Your vyb

HOME

Deliver · selects due – 48h · press

Your vyb – who is owed what, under which licence

Tour map

SURFACES

Camera Roll – shoot rolls, team picks, deliveries recorded as grants

The delivery desk – the seat's own surface

Drops – view – a drop date moves your week

Tasks assigned to you

Manager

Jules Park · blkwax

Receivable and dates across the acts, every decision that moves money, the card's ceilings, the CPA statement.

Surface · The desk

Your vyb

HOME

Position – receivable · dates · holds · money asks – from the desk

Tonight's settlement – the act's net, released on your tap

Decisions – nudge, approve, settle

Tour merch – inventory + per-show sell-through

Drops – next drop · what's on you

Your vyb – catches money moving and decisions aging

Between teams – threads needing your confirm

THE DESK

Settlement – keyed confirm – never settles the same night twice

Travel – approve the seat the road asked for

Offers – confirm on Proposals, never a second gate

Advance – draw against confirmed dates

Rollout – the campaign's money and calendar: spend lines confirm at this desk · both seats sign the treatment

Books – statement for the CPA

MONEY

VYB Card – issue cards, ceilings per holder, move budget between lines – each audited

Bidding queue – lock a bid with a deposit · decline

Expense books – export the PDF – audited

Operator ledger – the room's reconciled truth · view only

Sub-merchants – the roster that settles your act · view

TEAM

Assign a task – to any teammate

Camera Roll – curate

Listen

Flights – compare OTAs & book

Roster – the acts you share a desk with · view

Drops – file metadata, pitch, confirm the PO – the money edge

DSP integration – file ISRC / UPC with the distributor, submit the Spotify editorial pitch (7 days out), deliver to all stores on schedule, read pre-saves & streams per DSP

Between teams – your vyb ↔ the room's vyb: settlement terms, the drop at the stand

Tour Manager

Remy Okafor

Lobby call to load-out, crew flights, merch stock, the card on the road.

Surface · The run, day by day

Your vyb

HOME

Today · call sheet – lobby call → load-out

Your vyb – the half of the day that changes

Tour merch – restock, reorder

Tour map

SURFACES

The run, day by day – the seat's own surface

Flights – book crew travel

Expense books – tally + export

VYB Card – issue, ceilings, budget

Show detail – settle + crew

Camera Roll – curate

Drops – view – release dates and merch landings that move the run

DSP integration – view – delivery state per store

Booking Agent

Tom Price · WME

Holds expiring, offers shaped and sent, the book of acts, routing windows.

Surface · The booking desk

Your vyb

HOME

Holds expiring – the clocks

Your vyb – the routing hole, one earned wake-up

Propose – put a shaped date in front of an act

Between teams – your vyb ↔ the room's vyb on a two-night option

SURFACES

The booking desk – the seat's own surface

Roster – the agency's book of acts

Proposals – you send, the act's side confirms

The room's desk – work holds on any room

Venue · Score – read

Between teams – negotiate routing; confirm terms

Label

indie label · roster of 12

Tour support the week it's spent, recoupment as a query instead of a quarter-end project, the roster's road data before the next routing locks.

[Surface · The roster ledger](#)

[Your vyb](#)

HOME

Roster – every act · receivable, dates, next drop

Tour support – committed vs spent, per act, this week not this quarter

Decisions – fund a support line, sign off a recoup statement

Your vyb – spend crossing a ceiling, a drop losing its lead time

Between teams – threads with the acts' desks waiting on you

SURFACES

The roster ledger – advances, costs and settlements per act – the seat's own surface

Recoupment – the statement is a query, not a project · export audited

Tour support – fund a line to an act's desk; the desk issues the cards

Advance – fund against confirmed dates on your own roster

Drops – roster release calendar · priority flags · view

Rollout – the campaign around a priority drop · view

DSP integration – view – delivery state, pre-saves and streams across the roster

Venue · Score – read the rooms the roster plays

Between teams – the label's vyb ↔ each desk's vyb: recoup statements, tour-support asks

Venue Operator

Goldenvoice · 5 LA rooms

Tonight's ledger, the reconciliation run awaiting your tap, vendors that can and cannot be paid, the desk across every room.

Surface · Operator intelligence

Your vyb

HOME

Tonight · Control Center – GPV · run status · vendors cleared/held · POS lanes live

Your vyb – texts you about the rooms you're not standing in

Efficiency report – proven recoverable + what linking a feed unlocks

Between teams – threads waiting on your confirm

Portfolio – 5 rooms · blended score · net to operator

Flagship – the room's Score · economics · desk

Show economics – POS · per-head · show P&L

Booking desk · all rooms – holds → settled

Inbound bids – → the room's own desk

MONEY

Operator Control Center – Ledger · Margin · Reconcile · Pulse – confirm the run; the vendor leg pays cleared parties and holds the rest

Sub-merchants – KYB/KYC roster · invite a party · fix KYB · pay on confirm

Pilot · the case – what each partner gets · payflow

Room economics – net to operator first; how VYB earns behind a disclosure

Reports – reconciliation & payout registers – exported, audited

ROOMS

Portfolio – rollups only a book has

VYB Score · rooms – settled truth ×2 · community ×1 · public ×0.75

Booking desk – confirm · take deposit · settle · decline · release

Show economics – link / unlink the POS, benchmarks, insights

Efficiency report – holes in how the room runs · holes in what VYB can see

AGENTS

Your vyb – the room's own agent – asks route to the in-app confirm

Between teams – the room's vyb ↔ the desk's vyb (settlement terms, merch at the stand) · the room's vyb ↔ the agency's vyb (two-night option)

Mirrors `Persona.swift` and `vyb.can()` in SQL. Default to the least access; a per-membership override can narrow or widen a key.

04

Integrations — what VYB reads and where it writes

DSPs

Stem · DistroKid · TuneCore · The Orchard · AWAL → Spotify · Apple Music · YouTube Music · Amazon Music · Tidal. VYB reads delivery receipts, pre-saves and streams back per store; it never uploads audio itself.

[Artist](#) · [DJ](#) · [Manager \(TM, Photographer, Label view\)](#)

Streaming accounts

Spotify for Artists · Apple Music for Artists – connected to the act's seat.

[Artist](#) · [DJ](#)

Storefront

Shopify – catalog, inventory and sales synced read-only; drops stage their listing there.

[Manager](#) · [TM \(Artist · DJ view\)](#)

Fulfillment

Printful (print on demand) · bulk screen-printers · 3PL pick & pack – a purchase order with a lead time, checked against the drop date.

[Manager \(confirms the PO\)](#) · [Artist \(approves the run\)](#)

Point of sale

Toast · Square · Clover · Lightspeed · Stripe Terminal – read the room's checks, attribute nights to shows. Keep Toast; add VYB.

[Venue operator](#)

Ticketing

AXS · DICE · Eventbrite – advance counts and attendance for per-head economics.

[Venue operator](#) · [the room's vyb](#)

Settlement rail

Stripe (manual-capture deposits, Connect payouts) – every money move behind an in-app tap-confirm.

[Manager](#) · [TM](#) · [Venue operator](#)

Travel

Duffel + fare aggregators – compare OTA offers; book gated to the card holders.

[Manager](#) · [TM \(everyone compares\)](#)

Concierge transport

Twilio (SMS / iMessage) – @vyb in the thread; proposal cards deep-link to the confirm.
[Every seat](#)

05

The rules under every surface

Money is never auto-executed

Every money action is an explicit in-app tap-confirm. The confirm is the legal record.

Scope is narrow by default

Capabilities are allow-listed per seat. Least access unless a membership says otherwise.

Everything consequential is audited

Grants, confirms, revokes, money, exports – an append-only trail, scoped to what the seat may read.

Privacy

Concierge messages ≤ 30 days. PII envelope-encrypted. Venue reviews never publicly attributed.

One source of truth

Swift state machines mirror the SQL. The demo runs entirely on seeded data; the live store is one config flip.
